* All high power emitter LED products mounted on aluminum metal-core printed circuit board, can be lighted directly, but we do not recommend lighting the high power products for more than 5 seconds without a appropriate heat dissipation equipment. * Re-flow,wave peak and soak-stannum soldering etc.is not suitable for this products. * Suggest to solder it by professional high power LED soldering machine. * Can use invariable-temperature searing-iron with soldering condition:≤260 degree less than 3 seconds.
