◆ Precautions For Use

1. Suggest the LEDs should be kept between 5°C and 30°C and 60%RH or less before opening the package, The max. storage period before opening the package is 1 year.
2. After opening the package, the LEDs should be kept at 30°C/35%RH or less, and it should be used within 3 hours. In the event of incomplete usage, it is advised that user preheat the remaining devices at 60±5°C for 8 hours prior to use.
3. Reflow soldering should not be done more than twice. When soldering, don't tress on LEDs during heating. After soldering, don't warp the circuit board.
4. Repair should not be done after the LEDs have been soldered. When repair is unavoidable, Double-head soldering iron should be used. It should be confirmed beforehand whether the characteristics of the LEDs will be damaged by repair or not.

◆ Soldering Iron:

- Temperature at tip of iron: 300 °c Max.(25W Max)
